

Extreme Camp Makeover Events

Adopt-A-Cabin/Moon Beach

Ever since our camps were established, generous volunteers have helped build and maintain the many buildings and spaces that are part of these special places apart from the over-developed, busy spaces of our lives. More recently, over the last three years, many of these generous souls have gathered at camp to attend to the needs of our lakefront cabins at Moon Beach. This year we'll be continuing this long-standing tradition of generosity and action by attending to several more lakefront cabins in need. In 2008 and 2009, many wonderful people committed to "adopt-a-cabin" — where they financed and fixed a cabin in need.

Mix new carpet, windows, roofs, and paint with some TLC and you have the recipe for a fun event. If you have a willingness to participate in this process or you have a group looking for a mission, then this week is for you.

Please contact the Moon Beach office at 715-479-8255 or mbc@ucci.org for more information about this fun and exciting opportunity!

Shoreline Restoration/ Moon Beach

The spring week will work on completing the Wisconsin Department of Natural Resources (DNR) plan to restore the unique shoreline at Moon Beach. We will be planting native plants, trees, and shrubs along the lake toward Vesper Point. This project includes widening the sidewalk, testing various deer repellent systems, and creating numerous irrigation systems including rain gardens and barrels. Under the guidance of the DNR and in conjunction with the Alma/Moon Lake District, we hope to re-establish the shoreline, help control erosion and water runoff, and positively impact the environment for years to come.

This event promises to be both educational and spiritual as we restore the shoreline back to God's original plan! Please contact the Moon Beach office at 715-479-8255 or mbc@ucci.org for more information about this fun and exciting opportunity!

Workcamp Weekends/ Pilgrim Center

2009 was an incredible year at Pilgrim Center. In a twelve month period we demolished seven 1950s era buildings and built four spacious new three-season cabins and a stunningly beautiful year-round chapel. This was all possible due only to the generosity of so many people who shared their time, skills, and financial gifts. Last year as we built these five buildings we put many smaller projects on the "back burner." Now it's time to tackle some of these projects. We need to re-roof a few buildings, paint a couple cabins, clear trails, and lots more smaller projects. Our workcamp weekends this year will focus on all of the little details which help make camp feel "well cared for" and welcoming.

Landscaping, gardening, roofing, painting, cutting firewood — bring whatever skills you have to share! Surely there is a place on our campus where your gifts are needed and will be appreciated!

For more information or to talk more about how you can help contact Jeff Puhlmann-Becker, the Managing Director at Pilgrim Center, at 920-PILGRIM (920-745-4746) or jeff@ucci.org.
